providing the service center a signal indicating that the conditions for an alert are satisfied; and

alerting a designated location from the service center upon receiving the signal.

sub.A

3. (Amended) The method of claim 1, wherein the signal from the mobile unit is sent via the wireless network service connection.

(Amended) The method of claim 1, wherein the alerting comprises telephoning the designated location.

- 5. (Amended) The method of claim 1, wherein the alerting comprises sending e-mail to the designated location.
- 6. (Amended) The method of claim 1, wherein providing the information that identifies the conditions for the alert, comprises downloading the information from the service center to the mobile unit.

Sub. BI

14. (Amended) A delivery method comprising:

creating a list of destinations for deliveries at a service center, the list including a threshold distance for one or more destination for which an alert should be generated;

downloading a portion of the list of destinations to a mobile unit installed in a delivery vehicle, the downloading being effectuated over a wireless network connection which links the mobile unit to the service center over a wide area network;

selecting a destination from the list as a next destination for a delivery vehicle;
